For ECP disaster designations approved for implementation on or after December 6, 2010, all

NSA/CSS Policies

Typically, style guides start from one or a few base accent colors, from which the rest of the palette is drawn. Using variables for only the base colors is more efficient than having to manually tweak each color variation. Unfortunately, CSS doesn't yet have color modification functions. (They're coming in CSS Color 5, edited by yours truly!)
